Target version:			
Description			
<p>http://download.opensuse.org/ports/aarch64/tumbleweed/iso/ is missing kubic ISO, whereas it is in :ToTest: https://build.opensuse.org/package/binaries/openSUSE:Factory:ARM:ToTest/000product:openSUSE-Tumbleweed-Kubic-dvd5-dvd-aarch64/images</p> <p>It should be just a matter of updating script to match kubic ISO.</p>
