Description

Observation

openQA test in scenario sle-15-SP1-Installer-DVD-x86_64-offline_sles12sp3_media_base_def_full_lock@64bit fails in [installation_overview](#)

Reproducible

Fails since (at least) Build [104.1](#) (current job)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2018-11-30 02:04 - coolgw

can be closed, please check the latest result.

https://openqa.suse.de/tests/latest?arch=x86_64&version=15-SP1&flavor=Installer-DVD&test=offline_sles12sp3_media_base_def_full_lock&distri=sle&machine=64bit

#2 - 2018-11-30 02:05 - coolgw

- Status changed from New to Resolved

#3 - 2018-12-05 07:47 - coolgw

- Status changed from Resolved to In Progress

happen again, performance issue?

https://openqa.suse.de/tests/2296456#step/installation_overview/3

#4 - 2018-12-11 02:55 - coolgw

- Status changed from In Progress to Closed

check the following link, from 108.1 this issue not exist anymore, so close it

https://openqa.suse.de/tests/2296456#next_previous

#5 - 2018-12-24 06:20 - coolgw

- Status changed from Closed to New

reopen it since happen on milestone case now

<https://openqa.suse.de/tests/2340593#>

#6 - 2019-01-07 06:31 - coolgw

rerun with diff lock_package:

```
/usr/share/openqa/script/clone_job.pl --from http://openqa.suse.de --host http://openqa.suse.de 2341653 --apikey xxx --apisecret xxx
```

```
SCC_REGCODE=xx _GROUP=0 LOCK_PACKAGE="which,sysvinit-tools" --skip-download
```

```
Created job #2359021: sle-15-SP1-Installer-DVD-x86_64-Build128.1-offline_sles12sp3_media_base_def_full_lock@64bit ->
```

<http://openqa.suse.de/t2359021>

The result show OK now.

Then conclusion is this issue should not happen if we set correct lock package(replace cron with which), the conflict will not happen and no need send alt-o, so close this issue now.
