openQA Tests - action #44450
[functional][y] Adjust test modules to yast lan changes
28/11/2018 12:49 pm - riafarov

Status: Resolved
Priority: High
Assignee: riafarov
Category: Bugs in existing tests
Target version: Milestone 22
Difficulty:

Start date: 28/11/2018
Due date: 12/02/2019
% Done: 0%
Estimated time: 0.00 hour

Description

Motivation

See more details in https://trello.com/c/so0amSNp/342-sle-15-sp1-yast2-network-clarify-hostname-setup

This will require fixes for following test modules:
console/yast2_lan.pm
console/yast2_lan_hostname.pm
tests/x11/yast2_lan_restart_devices.pm

Acceptance criteria

1. Tests are adjusted to the new UI
2. Tests still work for distributions which have old UI
3. Changes should be based on PR provided https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6276

Suggestions

Potentially we should move more common parts to lib/y2lan_restart_common.pm if any detected

History

#1 - 28/11/2018 01:02 pm - riafarov
- Status changed from Workable to Blocked
- Assignee set to riafarov

#2 - 28/11/2018 01:03 pm - okurz
https://build.opensuse.org/request/show/652281 is the corresponding openSUSE:Factory SR, currently in review. I have seen no related staging tests, I guess the tests would not fail on these, let's see.

#3 - 28/11/2018 01:03 pm - okurz
- Target version set to Milestone 21

#4 - 28/11/2018 01:04 pm - okurz
- Category set to Bugs in existing tests

#5 - 29/11/2018 01:56 pm - okurz

04/04/2020
[29/11/2018 14:25:15] <fcrozat> it looks like yast2_lan needs some love for latest yast2-network package
[29/11/2018 14:50:41] <okurz> fcrozat: I assume this is https://build.suse.de/request/show/178723 ?
[29/11/2018 14:51:04] <fcrozat> okurz (IRC): yes, this is part of some bug fixes / cleanup
[29/11/2018 14:51:28] <okurz> https://build.opensuse.org/request/show/652549 seems to be the corresponding Factory submission …
[29/11/2018 14:53:10] <okurz> couldn't find any related staging openQA tests for Factory staging, checking if we have a ticket for that …
[29/11/2018 14:54:57] <okurz> fcrrozat: https://progress.opensuse.org/issues/44450 is the according ticket in our backlog. We are waiting for a failing Factory staging test before we would try to adapt the tests

#6 - 07/12/2018 11:41 am - riafarov
- Status changed from Blocked to New

Change reached TW staging: https://openqa.opensuse.org/tests/810847#step/yast2_lan/14

#7 - 12/12/2018 07:39 am - okurz

coolo was saying that https://openqa.suse.de/tests/overview?groupid=125&amp;version=15-SP1&amp;distri=sle&amp;build=Y.133.1 is now in a state where it's purely QA work IMO.

I responded: coolo: thanks for your update. The plan was that QSf-y looks into the according changes in Factory staging first, e.g. https://openqa.opensuse.org/tests/813583#step/yast2_lan/14 as the comparable step.

#8 - 12/12/2018 12:19 pm - okurz
- Priority changed from Normal to High

was mentioned by behlert and jsrain as they were looking into what is missing for Beta1.

#9 - 12/12/2018 12:40 pm - okurz
- Status changed from New to Blocked

Informed behlert and jsrain in #dist that it was our plan to adjust the corresponding openSUSE Factory staging tests first and then have SLE covered. Also, I mentioned that we already knew about the issue but https://trello.com/c/so0amSNp/342-sle-15-sp1-yast2-network-clarify-hostname-setup still has open points, e.g. "UI changes blessed by Ken". We in QSf-y did not really want to update test cases again (because we already did multiple times in before vain) only to see the UI change again.

jsrain informed: “I don’t know why those are still open, Michal wanted to do even further changes which many (Lukas, me Thorsten) opposed. Anyway, the changes are now merged :-/”

Still, I would propose to try to not waste our efforts when potential UI changes might still come.

@riafarov agreed to block by the trello card? I also watch it now.

#10 - 12/12/2018 12:49 pm - riafarov

@okurz: sure, makes sense. Test doesn't have many steps and we also got new set of icons in the partitioner:
And I also want to get it clarified that we don't reneedle multiple times which was already the case for the YaST staging for TW with the sidebar.

#11 - 13/12/2018 09:35 am - okurz

SLE15SP1 PM behlert definitely wants to have the YaST changes in for SLE15SP1 Beta2 so we should really put more focus on this issue, not skipping over steps but support the YaST development team to have the first steps done faster.

@riafarov can you help to coordinate with the YaST team to help here?

#12 - 13/12/2018 09:35 am - okurz
- Related to action #45023: [functional][y] Reneedle expert partitioner due to icon changes added

#13 - 13/12/2018 09:37 am - okurz

Also I will try to adress mfilka in #yast about the open points in the trello card.

#14 - 13/12/2018 10:13 am - okurz

[13/12/2018 10:40:03] <okurz> I understood that https://trello.com/c/so0amSNp/342-sle-15-sp1-yast2-network-clarify-hostname-setup should be in SLE15SP1 Beta2 but I see open points in the checklist of this card so regarding adjustments of openQA tests we wanted to wait until this is confirmed so that we do not need to recreate needles multiple times and such. Anyone can clarify when we can expect this?
[13/12/2018 11:10:07] <mchf> jsrain, okurz: there are open points in trello bcs I asked ken for blessing ui change. I haven't got response so far. I'll ping him.
[13/12/2018 11:12:40] <okurz> mchf: thx. Depending on when we would receive an answer I hope we can ensure that according submissions to Factory and SLE15 along with the necessary openQA test adaptations happen soon enough so that we have a stable state for SLE15 Beta2

#15 - 14/12/2018 09:23 am - okurz

[13/12/2018 23:00:57] <DimStar> okurz: RAID0 in Staging:M is green `o/ https://openqa.opensuse.org/tests/815044

But now there seems to be a problem with Networking, DimStar is investigating

#16 - 18/12/2018 10:31 am - riafarov
- Related to action #44786: [sle][functional][y][medium] Create test suite to test that YaST2 lan rewrite hostname change properly (bsc#1052042) added

#17 - 18/12/2018 10:32 am - riafarov
- Description updated

#18 - 18/12/2018 10:51 am - riafarov
- Due date changed from 18/12/2018 to 08/01/2019
- Target version changed from Milestone 21 to Milestone 22

#19 - 20/12/2018 09:47 am - SLindoMansilla
- Related to action #38195: [sle][functional][y] test fails in yast2_lan - yast2_lan is not starting up added

#20 - 20/12/2018 09:48 am - SLindoMansilla

Not sure if duplicate: #38195

It was reported against 12-SP4. But, it never failed again since then (3 months ago)

#21 - 02/01/2019 10:12 am - okurz
- Due date changed from 08/01/2019 to 15/01/2019

Adjust to sprint end date of current sprint

#22 - 14/01/2019 02:49 pm - riafarov

Still no feedback from UX side

#23 - 15/01/2019 10:32 am - riafarov
- Due date changed from 15/01/2019 to 29/01/2019

#24 - 22/01/2019 03:55 pm - riafarov
- Status changed from Blocked to Workable

Changes are accepted by Ken.

#25 - 24/01/2019 04:35 pm - riafarov
- Status changed from Workable to In Progress

#26 - 28/01/2019 07:45 am - riafarov
- Status changed from In Progress to Feedback

#28 - 29/01/2019 10:22 am - oorlov
- Due date changed from 29/01/2019 to 12/02/2019

PR not yet merged

#29 - 01/02/2019 10:24 am - riafarov

https://openqa.suse.de/tests/2430290
#30 - 01/02/2019 10:25 am - riafarov

https://openqa.suse.de/tests/2430868#settings (in progress)

#31 - 01/02/2019 11:08 am - okurz

labeled the according xen scenario https://openqa.suse.de/tests/2430564#step/yast2_lan/108 as well

#32 - 01/02/2019 11:09 am - okurz

btw, PR is merged. Just stating that readers are not confused why #44450#note-28 mentions it’s not yet merged and the next comment #44450#note-29 states failing jobs.

#33 - 02/02/2019 09:49 am - okurz

Sorry, have reverted the PR with https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6699 to fix openSUSE and staging and 15SP1 tests and such as some more tests have failed there.

EDIT: and … probably most importantly, openSUSE update tests.

Please see my comment in https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6648#issuecomment-459951218
