Description

**Observation**

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-apparmor@64bit fails in aa_enforce

**Reproducible**

Fails since (at least) Build 20181231

**Expected result**

Last good: 20181224 (or more recent)

**Further details**

Always latest result in this scenario: latest

We no longer have a profile for /usr/sbin/nscd, due to this diff in the profile definition:

```diff
txt
--- /etc/apparmor.d/usr.sbin.nscd  2018-12-19 23:10:32.000000000 +0100
+++ usr.sbin.nscd  2019-01-08 20:02:54.000000000 +0100
@@ -10,7 +10,7 @@
    # ------------------------------------------------------------------
    #include
    
-tux
+profile nscd /usr/{bin,sbin}/nscd {
    #include
    #include
    #include
```

Since this is now a named profile, it is listed with the name, not with the path of the binary it guards (as it matches two binaries now)

This needs to be reflected in the way we test here

**History**

#1 - 10/01/2019 09:33 am - dimstar

--- /etc/apparmor.d/usr.sbin.nscd  2018-12-19 23:10:32.000000000 +0100
+++ usr.sbin.nscd  2019-01-08 20:02:54.000000000 +0100
@@ -10,7 +10,7 @@
# include <tunables/global>

- /usr/sbin/nscd {
  + profile nscd /usr/[bin,sbin]/nscd {
    # include <abstractions/base>
    # include <abstractions/consoles>
    # include <abstractions/nameservice>

The diff, hopefully better readable

#2 - 10/01/2019 09:39 pm - cboltz

See https://bugzilla.opensuse.org/show_bug.cgi?id=1120472#c14 for the fix (untested, but I'm quite sure it will work ;-) 

#3 - 14/01/2019 09:17 am - agraul
- Subject changed from aa_enforce: apparmor 2.13.2 introduced nscd as profile name to [sle][security] aa_enforce: apparmor 2.13.2 introduced nscd as profile name

#4 - 26/03/2020 06:32 am - ilzhao
- Status changed from New to Rejected
- Assignee set to ilzhao

Sorry, did not noticed this poo.
Assigned this poo to me and "reject" it as there is no this issue now.

It might be duplicated with this one "poo#45980 - [sle][security][sle15sp1] apparmor aa_autodep & aa_genprof tests need doing cleanup "
