The snapper_undochange test seems to affect the user-console somehow: http://artemis.suse.de/tests/1078

#4 - 16/01/2019 01:47 pm - dheidler

The actual problem is snapper_nodbus_restore which calls systemctl default which will kill all consoles but then only resets the root-console so the user-console status gets out of sync between openQA and the SUT.
