Description

Observation

openQA test in scenario sle-12-SP5-Server-MINI-ISO-x86_64-remote_ssh_controller@64bit fails in disable_grub_timeout

According to video, test does not shift through all tabs as we are used to on previous distris.
sle-12-SP4-Server-MINI-ISO-x86_64-Build0456-remote_ssh_controller@64bit
Seems like pressing right key does not work anymore as expected

Reproducible

Fails since (at least) Build 0109

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 22/01/2019 10:14 am - michel_mno

probably same hotkey problem for Leap15.1 ppc64le https://openqa.opensuse.org/tests/834920#step/disable_grub_timeout/7

I assume this is related to change of hotkeys in menu, similar to rejected bug https://bugzilla.opensuse.org/show_bug.cgi?id=1120958 for another test on Tumbleweed that asked the change to be done in openQA.

#2 - 31/01/2019 12:01 pm - riafarov

- Due date set to 12/02/2019

As I can see from the expectations, shortcut got changed. But as module is not failing for each scenario, there is some condition where we should do that.

I solved the problem just with needles in #45917. Let me check if this is different.

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: remote_ssh_controller

[https://openqa.suse.de/tests/2411124](https://openqa.suse.de/tests/2411124)
