**Description**

**Observation**

openQA test in scenario sle-15-SP1-Installer-DVD-x86_64-yast2_gui@64bit fails in yast2_firewall

It can be related to our pipe settings that command might fail in scenarios like that one. firewall-cmd --state returns non-zero code and grep most likely won't override it. assert_script_run in os-autoinst needs to be fixed for those cases.

**Reproducible**

Fails since (at least) Build 141.1

**Expected result**

Last good: 137.1 (or more recent)

**Further details**

Always latest result in this scenario: latest

**History**

#1 - 22/01/2019 06:18 am - JERiveraMoya
- Blocks action #46262: [functional][y] test fails in yast2_firewall - adapt test for including service configuration widget added

#2 - 23/01/2019 09:34 am - riafarov
- Status changed from New to Rejected
- Assignee set to riafarov

We found out that issue is with pipe behavior we have in openQA, so if first command fails, assert_script_run will still fail. So no steps are required.
