can you please update this to Done-kernel&network? For some reason, I can't update it

**#4 - 2019-02-24 18:48 - asmorodskyi**

I think the reason for this is that this is not "SUSE QA" project but "openQA tests" project and they have different set of versions

**#5 - 2019-02-24 19:36 - okurz**

I suggest you take a look into https://progress.opensuse.org/projects/suseqa/settings/versions. I looks like we can clear out the use of "kernel" versions there. "Current Sprint - kernel" is shared with the project tree, the other kernel target versions are not.
