Description

Commit e1c0176cea4fbbf488cd781d1c5a887be67506 (part of PR#6813) broke boot_grub_item(). It depends on wait_grub using check_screen instead of assert_screen.

Not sure how to fix/workaround it.
Adding extra record in grub + using it is important for IMA/EVM tests (there will be more of these tests).

First bad: https://openqa.suse.de/tests/2502716
Last good: https://openqa.suse.de/tests/2494992

History

#1 - 2019-02-28 09:14 - pvorel
- Description updated

#2 - 2019-02-28 09:20 - pvorel
- Assignee set to pvorel
- Target version set to 445

PR with quick fix (until better solution is found):
https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/6918

#3 - 2019-02-28 09:22 - coolo
- Project changed from openQA Project to openQA Tests
- Category changed from 128 to Bugs in existing tests

#4 - 2019-02-28 10:26 - okurz
- Status changed from New to Feedback

I merged your PR. If the fix is as easy as deleting the wait_boot call it's actually the best solution ;)

So I am setting to "Feedback" as I assume you will monitor the jobs on production anyway.

#5 - 2019-02-28 14:32 - pvorel
- Status changed from Feedback to Resolved

Fixed ;)
https://openqa.suse.de/tests/2505183

#6 - 2019-03-08 09:40 - jlausuch
- Target version changed from 445 to 457

#7 - 2019-03-28 07:25 - okurz
This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: ltp_ima
https://openqa.suse.de/tests/2726053
