**Description**

test fails in yast2_rmt hang on "yast2_rmt_service_status" screen

as per displayed screens, after detection of "yast2_rmt_service_status" needle, a transient new screen is displayed

"Starting RMT
Starting RMT server, sync and mirror timers ..."

before redisplay of same "yast2_rmt_service_status" needle that is not identified because test is looking for "yast2_rmt_config_summary" one that is never displayed.

**Observation**

openQA test in scenario opensuse-15.1-DVD-ppc64le-yast2_ncurses@ppc64le fails in yast2_rmt

**Test suite description**

Maintainer: zluo, riafarov Test for yast2 UI, ncurses only. Running on created gnome images which provides both text console for ncurses UI tests as well as the gnome environment for the GUI tests. riafarov set TIMEOUT_SCALE to improve stability of the test.

**Reproducible**

Fails since (at least) Build 86.1

**Expected result**

Last good: (unknown) (or more recent)

**Further details**

Always latest result in this scenario: latest

**History**

#1 - 06/03/2019 09:50 am - michel_mno

I do not know if problem is openQA yast2_rmt.pm related or a functional problem of yast2_rmt.

The y2log tail do not reports obvious error:

2019-03-05 10:50:57 <1> susetest(3136) [ui] YPushButton.cc(setFunctionKey):202 Guessing button role YOKButton for YPushButton "Next" at 0x1002c196be0 from function key F10

2019-03-05 10:50:57 <2> susetest(3136) [ui-shortcuts] YShortcutManager.cc(checkShortcuts):85 Not enough widgets with valid shortcut characters - no check

03/04/2020
Since build 177.2 no more failure for Leap 15.1 ppc64le, so set this issue as resolved.
