### History

#### #1 - 2019-04-29 06:15 - pstivanin

- Due date set to 2019-05-10
- Status changed from New to In Progress
- Assignee set to pstivanin
- Start date changed from 2019-03-14 to 2019-04-30
- Estimated time set to 24.00 h

#### #2 - 2019-04-30 13:46 - pstivanin

- Start date changed from 2019-04-30 to 2019-05-02

#### #3 - 2019-05-02 08:30 - pstivanin

- % Done changed from 0 to 40
- Estimated time changed from 24.00 h to 16.00 h

#### #4 - 2019-05-02 12:06 - pstivanin

- % Done changed from 40 to 60

#### #5 - 2019-05-02 14:21 - pstivanin

- % Done changed from 60 to 80

Code has been implemented, now testing it everywhere

#### #6 - 2019-05-03 13:51 - pstivanin

- Target version changed from QAM tests - future to QAM tests - current
- % Done changed from 80 to 100

PR is ready for review: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/7381>

#### #7 - 2019-05-03 13:52 - pstivanin

Changing the security level of the host doesn't work, so I opened a bug for that: [https://bugzilla.suse.com/show\\_bug.cgi?id=1134013](https://bugzilla.suse.com/show_bug.cgi?id=1134013)

#### #8 - 2019-05-09 06:35 - pstivanin

YaST2 security is not 'integrated' with passwd, so in order to verify that the 'min passwor' feature works, the 'Users' module should be used.

This could be a thing to keep in mind if we want to increase the test coverage

**#9 - 2019-05-17 07:20 - pstivanin**

- Estimated time changed from 16.00 h to 10.00 h

**#10 - 2019-05-22 06:23 - pstivanin**

- Status changed from In Progress to Resolved

**#11 - 2019-05-30 11:30 - vpelcak**

- Status changed from Resolved to In Progress

Test does something completely different than described in the reference:

[https://www.suse.com/documentation/sles-15/singlehtml/book\\_sle\\_admin/book\\_sle\\_admin.html#id-1.3.3.6.13.6.29](https://www.suse.com/documentation/sles-15/singlehtml/book_sle_admin/book_sle_admin.html#id-1.3.3.6.13.6.29)

<https://progress.opensuse.org/issues/49244> is about yast in cli, not gui.

Testcase is very useful, but doesn't test CLI at all.

**#12 - 2019-05-30 11:53 - pstivanin**

- Due date changed from 2019-05-10 to 2019-06-10

- Start date changed from 2019-05-02 to 2019-05-30

- % Done changed from 100 to 0

- Estimated time changed from 10.00 h to 8.00 h

**#13 - 2019-05-30 12:26 - pstivanin**

@Vit: changing the security level does not work at the moment. See the bug I opened above.

Should we proceed anyway to develop this test?

**#14 - 2019-05-30 12:35 - pstivanin**

- Start date set to 2019-03-14

due to changes in a related task

**#15 - 2019-05-30 12:35 - pstivanin**

- Due date deleted (2019-06-10)

- Status changed from In Progress to Workable

- Assignee deleted (pstivanin)

- Start date deleted (2019-05-30)

- Estimated time deleted (8.00 h)

**#16 - 2019-05-30 12:37 - pstivanin**

Until the aforementioned bug is solved there's not much we can do on our side.

Using the CLI, the only available commands are:

- level (which does not work)
- set
- summary (which displays only "custom settings" due to the bug) There's no "get" command, so even if we developed a test that sets something we would have no way to know whether the settings has been correctly applied.

**#17 - 2019-12-05 14:16 - brhavel**

- Subject changed from [qam] Regression test yast security to [qam][maint][yast2-security] - Regression test yast security

- Status changed from Workable to Feedback

**#18 - 2020-06-05 12:59 - tjyrinki\_suse**

- Status changed from Feedback to Blocked

The bug is still open.

**#19 - 2020-11-12 08:41 - tjrinki\_suse**

- *Project changed from QAM to qe-yast*
- *Target version deleted (QAM tests - current)*

**#20 - 2020-11-12 08:52 - tjrinki\_suse**

- *Status changed from Blocked to New*

**#21 - 2020-11-17 10:17 - riafarov**

- *Subject changed from [qam][maint][yast2-security] - Regression test yast security to Regression test yast security*
- *Target version set to future*
