Description

Motivation

I as a QA Project Manager would like to know which tests were not executed for particular build in the report to understand risks we have to miss bugs in given areas.

https://github.com/os-autoinst/openqa_review/issues/98

Follow-up of #37429

Acceptance criteria

1. Generated report from openqa-review includes section which lists skipped tests with urls to them
2. No duplicates are shown in the report
3. Machine name is appended to the item in case differs to the default

Further details

Script can be executed manually.

Generated reports can be found here: Latest report based on openQA test results http://s.qa.suse.de/test-status, SLE12: http://s.qa.suse.de/test-status-sle12, SLE15: http://s.qa.suse.de/test-status-sle15

For example:

- extra_tests_in_textmode
- minimal=proxy_SCC-postreg_SUSEconnect
- minimal=proxy_SCC-postreg_SUSEconnect@hyperv
- pcm_azure
- pcm_googlecloud

Currently we have list which is duplicated

PR: https://github.com/os-autoinst/openqa_review/pull/121

#6 - 2019-04-23 08:41 - riafarov
- Due date changed from 2019-04-23 to 2019-05-07

#7 - 2019-04-24 09:27 - riafarov
- Status changed from In Progress to Feedback

#8 - 2019-05-07 08:47 - JERiveraMoya
- Due date changed from 2019-05-07 to 2019-05-21

Remaining part is PR review. Moved to next sprint.

#9 - 2019-05-10 13:44 - ybonatakis
The report pages seem that they are used still old code. Need to deploy new build for openqa-review

#10 - 2019-05-21 09:01 - JERiveraMoya
- Status changed from Feedback to Resolved

It was successfully deployed.
