

openQA Tests - action #50309

[qam][blue][leap][opensuse] Update online_repos behavior to activate online repositories

2019-04-11 12:38 - pcervinka

Status:	Resolved	Start date:	2019-04-11
Priority:	High	Due date:	
Assignee:	pcervinka	% Done:	0%
Category:	Enhancement to existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
Observation			
openQA test in scenario opensuse-15.1-DVD-Updates-x86_64-install_with_updates_gnome@64bit-2G fails in setup_online_repos			
Test suite description			
Reproducible			
Fails since (at least) Build 20190321-2			
Expected result			
Last good: (unknown) (or more recent)			
Further details			
Always latest result in this scenario: latest			
Analysis of current failure:			
Step in online_repos https://openqa.opensuse.org/tests/904506#step/online_repos/1 was never designed to be clickable on "YES" button. It just matches needle online-repos-popup and continues by pressing "alt-n". In Leap15.0 it means usual Next, but in 15.1 it means "NO" button to activate online repositories.			
<pre>[2019-04-11T07:47:19.148 CEST] [debug] >>> testapi::_handle_found_needle: found online-repos-popup-20190303, similarity 1.00 @ 49/259 [2019-04-11T07:47:19.148 CEST] [debug] /var/lib/openqa/cache/openqa1-opensuse/tests/opensuse/tests/installation/online_repos.pm:67 called testapi::wait_screen_change [2019-04-11T07:47:19.148 CEST] [debug] <<< testapi::wait_screen_change(timeout=10, similarity_level=50) [2019-04-11T07:47:19.149 CEST] [debug] /var/lib/openqa/cache/openqa1-opensuse/tests/opensuse/tests/installation/online_repos.pm:67 called testapi::send_key [2019-04-11T07:47:19.149 CEST] [debug] <<< testapi::send_key(key='alt-n', do_wait=0)</pre>			
Leap 15.1 changed behavior in Online repositories selection. It is expected now in online_repos phase instead of setup_online_repos. Test should be updated to reflect new behavior in Leap installer.
