openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-trinity@64bit fails in trinity			
Test suite description			
Reproducible			
Fails since (at least) Build 20190411			
Expected result			
Last good: (unknown) (or more recent)			
Further details			
Always latest result in this scenario: latest			
trinity test (part of openSUSE Tumbleweed kernel, for aarch64 and x86_64) cannot be succesful on o3, because test tries to add a repo to http://download.suse.de/ibs/home:/asmorodskyi/ which is suse internal only.

On aarch64, the right UEFI_PFLASH_VARS is also missing. The default one is used.
