#### Description

### Observation

This is an install only scenario. Tests modules after **first\_boot** shouldn't be there. They are not yet adapted for non-kubic/non-microos systems.

Caused by changes in:

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/commit/ef2d574187a68243cf7a810493ace5857f74e82e#diff-d3e0a6c7df772cff7741832a6250d5af>

### Acceptance criteria

- **AC1:** It is possible to use the setting **INSTALLONLY=1** to perform an install only installation on test suite **transactional\_server**.
- **AC2:** It is possible to schedule the test suite **transactional\_server** without the setting **INSTALLONLY** to perform the expected transactional server behavior only.
- **AC3:** There is at least one passed job per architecture in the **development job group**.
- **AC4:** The test suite for an architecture is moved to the **main job group** when there is a passed job in the **development job group**.

### Reproducible

Fails since Build [225.1](#)

### Expected result

Last good from x86\_64 Build(223.2): [https://openqa.suse.de/tests/2859478#step/first\\_boot/1](https://openqa.suse.de/tests/2859478#step/first_boot/1)

### Further details

Always latest result in this scenario: [latest](#)

- Has duplicate action #51314: [sle][functional][u] test fails in transactional\_update - never worked before added

**#8 - 2019-05-09 10:32 - SLindoMansilla**

- Status changed from New to Feedback

PR: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/7414>

Merged.

Waiting for verification run on OSD.

**#9 - 2019-05-09 11:09 - SLindoMansilla**

- Target version set to Milestone 24

**#10 - 2019-05-09 11:10 - SLindoMansilla**

- Status changed from Feedback to Resolved

Verified on OSD:

- aarch64: <https://openqa.suse.de/tests/2877290>
- ppc64le: <https://openqa.suse.de/tests/2877291>

**#11 - 2019-05-09 14:06 - szarate**

- Subject changed from [functional][u] test fails in transactional\_update - wrong test module schedule to [functional][u][aarch64] test fails in transactional\_update - missing file utt-sle-aarch64.tgz

- Status changed from Resolved to Workable

- Assignee changed from SLindoMansilla to mkravec

- Priority changed from High to Normal

Setting to workable again per pr: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/7421>

**#12 - 2019-05-09 14:10 - szarate**

- Subject changed from [functional][u][aarch64] test fails in transactional\_update - missing file utt-sle-aarch64.tgz to [functional][u][aarch64][ppc64le][s390x] test fails in transactional\_update - missing file utt-sle-aarch64.tgz

Also happens on ppc64le and I guess on s390 too if that architecture is also meant to support transactional updates

[https://openqa.suse.de/tests/2874294#step/transactional\\_update/9](https://openqa.suse.de/tests/2874294#step/transactional_update/9)

**#13 - 2019-05-09 17:15 - SLindoMansilla**

Setting INSTALLONLY=1 removed from test suite **transactional\_server** on [https://openqa.suse.de/admin/test\\_suites](https://openqa.suse.de/admin/test_suites)

**#14 - 2019-05-09 17:24 - SLindoMansilla**

- Description updated

Tests suite **transactional\_server** moved from [main job group](#) to [development job group](#) for all architectures until we have a passed test that matches the acceptance criteria.

please, no dirty hacks ;)

**#15 - 2019-05-09 17:25 - SLindoMansilla**

- Description updated

**#16 - 2019-05-09 17:30 - SLindoMansilla**

- Description updated

**#17 - 2019-05-10 09:12 - mkravec**

- Status changed from Workable to Resolved

All tests are green in SLE 15 / Functional group.

What do you mean by "not passing"? Where can I see acceptance criteria you mentioned?

<https://openqa.suse.de/tests/2880076> - x86\_64

<https://openqa.suse.de/tests/2880075> - aarch64

<https://openqa.suse.de/tests/2877291> - ppc64le

<https://openqa.suse.de/tests/2876886> - s390x

I added INSTALLONLY=1 variable again. Please stop breaking them by removing this variable!

If you want to remove it please provide PR that keeps them green without INSTALLONLY var.

Resolved by PR <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/7427>

**#18 - 2019-05-10 09:26 - SLindoMansilla**

- Status changed from Resolved to Workable

- Assignee changed from mkravec to SLindoMansilla

AC's are in the description.

Since the test suite are again using the setting INSTALLONLY, this ticket is not resolved.

As spoken I will take over.

**#19 - 2019-05-10 09:38 - mkravec**

Ah, I see :)

AC 3,4 should be met.

About AC 1,2 - we don't need INSTALLONLY for HDD export, we run 1 scenario per platform.

It seems like nice-to-have feature, not hard requirement. Just my 2c - feel free to fix that :)

Can we move jobs back to functional group? I don't think INSTALLONLY variable should be reason for devel group.

**#20 - 2019-05-10 10:44 - SLindoMansilla**

- Parent task set to #51362

Should actually be "new", but is not available. Waiting for parent task to be refined.

**#21 - 2019-05-10 11:24 - szarate**

- Description updated

- Status changed from Workable to Resolved

- Assignee changed from SLindoMansilla to mkravec

As discussed with Sergio, setting the ticket to resolved, as we now have an [poo#51362](#) as epic to target AC 1 and 2, since it's part of a bigger discussion.

**#22 - 2019-05-14 16:28 - SLindoMansilla**

- Parent task deleted (#51362)

**#23 - 2019-05-22 13:26 - SLindoMansilla**
