

openQA Project - action #51932

Trimming of white spaces on "machine definition"

2019-05-23 14:22 - sebchlad

Status:	Resolved	Start date:	2019-05-23
Priority:	Normal	Due date:	
Assignee:	Xiaojing_liu	% Done:	100%
Category:	Feature requests	Estimated time:	0.00 hour
Target version:	Current Sprint		
Difficulty:			
Description			
As it looks there is no trimming of leading white space characters which might result in fairly obscure problems with - for instance - scheduler picking up the jobs.

History

#1 - 2019-05-23 14:32 - okurz

- Category set to Feature requests

the actual example that we hit which caused weird behaviour is WORKER_CLASS= qemu_x86_64, not the space after =. It was interesting that within a scheduled job the setting on the page #settings rendered nicely and we only found the invalid value by inspecting the actual database content.

- Assignee set to Xiaojing_liu

#3 - 2019-05-28 09:45 - coolo

- Target version set to Current Sprint

#4 - 2019-05-31 08:30 - Xiaojing_liu

- Status changed from New to In Progress

<https://github.com/os-autoinst/openQA/pull/2086>

#5 - 2019-07-04 11:24 - okurz

PR was merged.

#6 - 2019-07-11 12:06 - okurz

@Xiaojing_liu do you see something missing for this ticket after the PR was merged?

#7 - 2019-07-12 02:12 - Xiaojing_liu

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

Do you mean I should change the ticket's status to "Resolved". If you mean that, thanks for your reminder. If you mean other, please let me know. Thanks.
