I don't understand what is the problem here. Is a random shuffling sufficient?

#9 - 2014-12-09 15:51 - coolo

it's been a while that this issue was created, but I assume this is about picking randomly out of the 50 prios instead of going through them as they were inserted. But feel free to reject and/or come up with your own ideas how to improve the scheduling of jobs

#10 - 2015-01-09 09:45 - coolo

- Status changed from New to Rejected

decided to drop
