Description

Observation

There is a bug opened for this: https://bugzilla.opensuse.org/show_bug.cgi?id=1138372

Summary: this is caused by GDM 3.32 update. We actually do not need to delete the test user because this is the last test. Removing test user has introduced many workarounds, so we can simply remove this part.

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-desktopapps-gnome@64bit fails in [change_password](#)
