failed in 2/20 "unit- and integration tests" runs in https://travis-ci.org/os-autoinst/openQA/builds/571252085 so this is still a thing.

I have already investigated this ages ago (with no success). This ticket is likely a duplicate.

I guess links to Travis CI jobs are pointless. At least it seems that I get a completely different log when accessing it now.

kraih as you are currently working on cache and also the test, otherwise I would continue with the test

#10 - 2019-11-13 11:28 - kraih

I've been running this test a lot during my refactoring work and have not actually seen the error once. In fact the test seems very stable now. Maybe it has already been fixed?

#11 - 2019-11-13 12:57 - okurz

Well, maybe your tests have covered this. Then I suggest you remove the test from the "unstable" ones and we will see in other PRs if we were wrong :)
