Description	
Hi,	
there should be some magic OBS publishing hooks for publishing Leap 15.2 to distribution/leap/15.2, and it looks those need to be also put in place for openSUSE:Leap:15.2:ARM . could you please do that? There is currently an aarch64 distribution in place that is waiting to be published.	
TIA, Dirk

needs to be done by some obs admin. Adrian is back you may want to talk to him. I already created the directory structure, the rest must come from OBS I believe
