

## openQA Project - action #54557

### All openQA tests incomplete but neither package build nor unit tests fail when a new file is added to os-autoinst without mentioning in Makefile.am

2019-07-23 07:29 - okurz

<b>Status:</b>	Resolved	<b>Start date:</b>	2019-07-23

<b>Difficulty:</b>			
<b>Description</b>			
<b>Observation</b>			
See e.g. <a href="https://openqa.opensuse.org/tests/988325/file/autoinst-log.txt">https://openqa.opensuse.org/tests/988325/file/autoinst-log.txt</a> failing with			
<pre>Can't locate consoles/ssh_screen.pm in @INC (you may need to install the consoles::ssh_screen module) (@INC contains: /var/lib/openqa/cache/openqa1-opensuse/tests/opensuse/products/opensuse/../../../../lib /var/lib/openqa/cache/openqa1-opensuse/tests/opensuse/lib /var/lib/openqa/pool/16/blib/arch /var/lib/openqa/pool/16/blib/lib /usr/lib/os-autoinst /usr/lib/perl5/site_perl/5.26.1/x86_64-linux-thread-multi /usr/lib/perl5/site_perl/5.26.1 /usr/lib/perl5/vendor_perl/5.26.1/x86_64-linux-thread-multi /usr/lib/perl5/vendor_perl/5.26.1 /usr/lib/perl5/5.26.1/x86_64-linux-thread-multi /usr/lib/perl5/5.26.1 /usr/lib/perl5/site_perl) at /usr/lib/os-autoinst/consoles/sshVirtshSUT.pm line 25. BEGIN failed--compilation aborted at /usr/lib/os-autoinst/consoles/sshVirtshSUT.pm line 25.</pre>			
caused by <a href="https://github.com/os-autoinst/os-autoinst/pull/1176">https://github.com/os-autoinst/os-autoinst/pull/1176</a> . What is interesting is that neither the self-tests in the the project nor any package builds or self-tests in <a href="https://build.opensuse.org/package/show/devel:openQA/os-autoinst">https://build.opensuse.org/package/show/devel:openQA/os-autoinst</a> fail.			
<b>Acceptance criteria</b>			
<ul style="list-style-type: none"><li>• <b>AC1:</b> Any tests or checks prevent a new os-autoinst package to be installed if a new file was added but not referenced in the Makefile for installation</li></ul>

Related to openQA Project - coordination #62420: [epic] Distinguish all types...		<b>Blocked</b>	<b>2018-12-12</b>

## History

### #1 - 2020-01-22 12:37 - okurz

- Related to coordination #62420: [epic] Distinguish all types of incompletes added

### #2 - 2020-07-12 09:11 - okurz

Happened again with <https://github.com/os-autoinst/os-autoinst/pull/1456> causing the same kind of severe problems. <https://github.com/os-autoinst/os-autoinst/pull/1464> created as an immediate fix for the introduced problem but not a solution preventing this in the future again. Hopefully OBS checks in pull requests will cover this in the future but maybe we can have a simple script that statically checks files. Triggered on o3: for i in aarch64 openqaworker1 openqaworker4 openqaworker7 power8 imagetester rebel; do echo \$i && ssh root@\$i "(transactional-update -n dup || zypper -n dup) && reboot" ; done. Retriggered incompletes using <https://github.com/os-autoinst/scripts/pull/28> and failed\_since=2020-07-10 additional\_filters="clone\_id is null and reason ~ 'died'" ./openqa-restart-incompletes-on-worker-instance

### #3 - 2020-07-12 15:10 - okurz

- Status changed from New to Feedback

- Assignee set to okurz

<https://github.com/os-autoinst/os-autoinst/pull/1466>

### #4 - 2020-07-13 12:14 - okurz

PR merged but based on feedback trying one step further: <https://github.com/os-autoinst/os-autoinst/pull/1469>

### #5 - 2020-07-28 11:27 - okurz

- Target version set to Ready

**#6 - 2020-07-29 19:13 - okurz**

- Status changed from Feedback to Resolved

<https://github.com/os-autoinst/os-autoinst/pull/1469> is fine and this also survived the move to cmake where we call it in <https://github.com/os-autoinst/os-autoinst/blob/bd050f804dd24b68c3b25de460f57a9ad8e6298c/cmake/test-targets.cmake#L16> and see results in testing like in <https://travis-ci.org/github/os-autoinst/os-autoinst/jobs/713022546#L805>
