Target version:	14.2		
Description			
inhume is a script to remove orphaned data from exited users out of kopano and owncloud.			

History

#1 - 2020-05-24 20:13 - flacco

- Due date set to 2020-06-01
- Status changed from New to In Progress
- % Done changed from 0 to 70

It's now possible to start the inhume script via invis-portal, but:

1. I think the javascript code is "quick and dirty"
2. The sssd cache refresh is much too slow. If a users is deleted, it tooks a long time to run inhume successfully caused by a test if the user is an active user by calling "getend passwd"

Please help!

#2 - 2020-05-30 13:54 - ingogoeppert

Looks good. I switched from getent to wbinfo

#3 - 2020-06-01 13:07 - flacco

- Status changed from In Progress to Closed
- % Done changed from 70 to 100
