Description

Observation

openQA test in scenario sle-15-Server-DVD-Incidents-x86_64-mau-extratests@64bit fails in [bind](#) with the error "zypper -n si bind' failed with code 105" however I can not find obvious problems in the log

Reproducible

Fails since (at least) Build [:11982:python](#) and sporadically, like 1/10 runs

Expected result

Last good: [:11967:gnome-music](#) (or more recent)

bind should be able to be properly installed reproducibly or a clear error message is given.

Problem

Could be related to problems to retrieve packages from openqa.suse.de itself.

Further details

Always latest result in this scenario: [latest](#)
