Description

Observation

it tries check nonexistent directory/volume

openQA test in scenario sle-15-SP1-Installer-DVD-QR-x86_64-btrfs_libstorage@uefi fails in [validate_no_cow_attribute](#)

Test suite description

Maintainers: QSF-y.

Test installation with btrfs filesystem and libstorage.
Validates no_COW attributes on subvolumes, file system on partitions, checks whether /home is on separate partition or not (depending on the system).

Reproducible

Fails since (at least) Build [3.14](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2019-08-19 09:34 - oorlov

The test failed because 'btrfs_libstorage' was scheduled instead of 'btrfs_libstorage-ng'. I've reverted the module in sle-15-Installer-DVD-QR Job Group to 'btrfs' as it was before, so that it used main.pm instead of yaml. I will monitor the job in the next build to check if it will be passed.
