

openSUSE 13.1 Release - action #571

make sure all opensuse bug reports are public

2013-06-26 10:26 - Inussel

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	scarabeus_iv	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
opensuse package changelogs must not refer to private bug reports as the reviewers may not be able to read them then. add a script for the factory-auto bot that rejects submissions that refer to private bug reports			

History

#1 - 2013-09-02 13:25 - Inussel

- Assignee set to scarabeus_iv
- Start date deleted (2013-06-26)

#3 - 2013-09-05 09:55 - scarabeus_iv

As most reviewers are employees would it not be better to just flag the bnc links as employee requiring and just expect review from somebody who actually can see the bugs.
Rather than just stripping the bug information?

#4 - 2013-09-05 10:14 - scarabeus_iv

Other option is to provide bugzilla privileges to the review team members.

#5 - 2013-09-16 12:22 - Inussel

I didn't say strip the bug information. I'd demand the bugs to be public.

#6 - 2013-11-21 12:04 - scarabeus_iv

- Status changed from New to Feedback
- % Done changed from 0 to 100

<https://github.com/cooloo/factory-auto/pull/46>

Seems to be done. Now up for cooloo to merge and we can enable it on the packagelists machine.

Since it is not possible to make the bugs open to public in most cases, it will boil down to either that fixes will no longer be submitted to openSUSE (bad for openSUSE) or that the bnc numbers will be stripped out (even not good for openSUSE).
So please think at first about the consequences before requesting to make all bugs public.

Not necessarily. Anybody able to spell `\|^\6R\` can avoid detection without stripping the bug number. But even if not, this protection is void anyway, since anybody can open a public bug that contains some general information that can be exposed and depends on the private bug.
