#### Description

### Observation

openQA test in scenario

sle-12-SP4-Server-DVD-Incidents-Kernel-ppc64le-install\_ltp+sle+Server-DVD-Incidents-Kernel@ppc64le-virtio consistently fails in [update\\_kernel](#) due to DNS error. Zypper almost always fails to resolve IP address of update repository host. The failure happens at different points in the test job (sometimes in module update\_kernel, sometimes in module install\_ltp) but it's always a DNS resolution error.

### Test suite description

install ltp with maintenance kernel/kgraft update

### Reproducible

Fails since (at least) Build [4.12.14-358.1.g6790685](#)

Oldest known failure of this type and build branch: [4.12.14-322.1.g0619c2b](#)

Oldest known failure of this type in other 12SP4@ppc64le branches: [:11846:kernel-ec2](#)

### Expected result

Last good: [4.12.14-356.1.gff88a5c](#) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

#### History

#1 - 2019-09-24 07:48 - MDoucha

- Status changed from New to Resolved

Base HDD image was broken. Fixed by fresh build.
