**Description**

**Motivation**

After manual testing, in scope of parent ticket and https://jira.suse.com/browse/SLE-5754, we set a typical use-case of autofs. Developing a test module based on this would be pretty easy.

**Acceptance criteria**

- Develop a test module for autofs

**Suggestions**

- This script could be used directly, or adapted https://github.com/JRivrain/scripts/blob/master/autofs-test.sh
- Some multi-machine tests could be considered, but are not strictly necessary, localhost can be used.

**History**

#1 - 2019-09-25 05:37 - JERiveraMoya
- Due date set to 2019-10-08
- Category set to New test
- Target version set to Milestone 28

#2 - 2019-09-25 08:37 - JERiveraMoya
- Due date deleted (2019-10-08)
- Assignee set to JERiveraMoya

It seems that autofs is not used on the partitioner according to @jrivrain. @jrivera will check if this ticket makes sense.

#3 - 2019-10-22 14:06 - riafarov
- Target version changed from Milestone 28 to Milestone 29

#4 - 2019-10-31 08:44 - riafarov
- Subject changed from [functional][y] Automate autofs testing to [functional][u] Automate autofs testing
- Assignee deleted (JERiveraMoya)
- Target version changed from Milestone 29 to future

Hey mgriessmeier! We figured out that autofs is not used by YaST components. Kernel team has some smoke test for it, so please, consider this as one of the items to extend testing in userspace.

#5 - 2020-04-07 08:34 - mgriessmeier
- Status changed from New to Workable
- Target version changed from future to Milestone 30
- Estimated time set to 42.00 h
check what our nis test is doing and see if we can combine it

#6 - 2020-04-15 08:01 - zluo
- Status changed from Workable to In Progress
- Assignee set to zluo

checking...

#7 - 2020-04-20 12:36 - zluo
- Status changed from In Progress to Rejected

we have now autofs.pm which scheduled for extra_test on o3 and osd.
