<b>Target version:</b>	
<b>Description</b>	
Latest (TW): <[zypp] Exception.cc(log):166 MediaSetAccess.cc(provide):266 CAUGHT: Permission to access ' <a href="http://download.opensuse.org/tumbleweed/repo/oss/x86_64/libKF5ConfigGui5-5.61.0-1.1.x86_64.rpm">http://download.opensuse.org/tumbleweed/repo/oss/x86_64/libKF5ConfigGui5-5.61.0-1.1.x86_64.rpm</a> ' denied> This happened at 292/646. Restarting zypper resulted in refresh that resulted in "Nothing to do." Zypper ref is now getting access denied errors.  Twice in past 24 hours or so Leap has been thwarted by failure to resolve download.opensuse.org. Aborting then restarting zypper up solved the problem. Whether this was 15.0 or 15.1 or both I don't recall.  Looks like dejavu <a href="https://bugzilla.opensuse.org/show_bug.cgi?id=1151998">https://bugzilla.opensuse.org/show_bug.cgi?id=1151998</a> claimed  <b>fixed some hours ago.</b>  Evolution as taught in public schools is religion, not science.  Team OS/2 ** Reg. Linux User #211409 ** a11y rocks!  Felix Miata *** <a href="http://fm.no-ip.com/">http://fm.no-ip.com/</a>	

#### History

#1 - 2019-09-26 05:22 - pjessen

- Category set to Mirrors
- Status changed from New to Closed
- % Done changed from 0 to 100
- Private changed from Yes to No
