Description	
Random fail: https://openqa.suse.de/tests/3422095	
An improvement should be made to stop send alt-s, this has a counter-effect of changing tab and test fails. Suggestion is: send alt-s once and check_screen, if check_screen says alt-s was not accepted try once more. If it still fails give-up as probably openQA is not interpreting that key combination.
