<b>Category:</b>	Enhancement to existing tests	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
In test "cryptlvm" <a href="https://openqa.suse.de/tests/3454044#downloads">https://openqa.suse.de/tests/3454044#downloads</a> , there's an exported hdd image, around 8GB: <a href="https://openqa.suse.de/tests/3454044#downloads">sle-12-SP5-x86_64-Build0277-Desktop-DVD@64bit-gnome-encrypted.qcow2</a> . But we don't need this encrypted image for SLED. So I plan to change the testsuite "cryptlvm" to "cryptlvm-sled" that doesn't publish this hdd (by remove variable PUBLISH_HDD_1).			

#### History
