| Description | | | |
| Hello, | | | |
| I am getting a HTTP Status 503 when accessing doc.o.o. I don't see any maintenance notice on status.o.o. | | | |
| I am reporting it as an incident. | | | |
| Regards, | | | |
| Ish Sookun | | | |

Thanks for the report!

That "maintenance" page is somewhat trolling you - for an explanation (and more funny stories), you might want to watch the video of my "Heroes, not Superheroes" talk from oSC18 ;-)

It looks like someone stopped apache on the server that provides doc.o.o - I restarted it, and doc.o.o is back :-) but I'll keep the ticket open to get the background clarified.

Sorry I am the one to blame.

We are doing several cleanups on monitoring and somehow I didn't find what this machine was doing, so I turned apache off. Will take more care next time.
