#### History

##### #1 - 2019-10-11 11:56 - okurz

- Subject changed from random test failure in yast2\_storage\_ng to [qam][sporadic] random test failure in yast2\_storage\_ng
- Assignee set to pstivanin
- Priority changed from Normal to High

Setting priority to "High" as is commonly done for sporadic issues which IMHO are causing more problems than reproducible ones. [https://openqa.suse.de/tests/latest?arch=x86\\_64&distri=sle&flavor=Installer-DVD&machine=64bit&test=yast2\\_gui&version=15-SP2](https://openqa.suse.de/tests/latest?arch=x86_64&distri=sle&flavor=Installer-DVD&machine=64bit&test=yast2_gui&version=15-SP2) is the corresponding scenario from SLE15SP2 as maintained by the QSF-y team. They however have decided to use a different test schedule "schedule/yast/yast2\_gui.yaml" which does not include the failing module "yast2\_storage\_ng". The maintainer of yast2\_storage\_ng is pstivanin. [pstivanin](#), can you help?

- Status changed from New to In Progress

Looking into it.

What's weird is that the same run on a different worker worked (<https://openqa.suse.de/tests/3461275>).
