

## openQA Tests - action #58151

### [transactional][microos] test fails in transactional\_update

2019-10-14 15:37 - fos

<b>Status:</b>	New	<b>Start date:</b>	2019-10-14
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Bugs in existing tests	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Difficulty:</b>			
<b>Description</b>			
<b>Observation</b>			
openQA test in scenario microos-Staging:N-Staging-DVD-x86_64-microos@uefi-staging fails in <a href="#">transactional_update</a>			
<b>Test suite description</b>			
<ol style="list-style-type: none"><li>1. The first problem is that the "transactional-update" module test is counting as "passed", even though one of the tests failed (trup_call probably needs to die if wait_serial fails).</li><li>2. This is the original problem of this test: In stagings the repository with the updated package is not available, thus the command will not do any update and fail to meet the test criteria. The repository probably has to be added first.</li><li>3. Looking at the test case it seems the test starting from <a href="https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/transactional/transactional_update.pm#L101">https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/transactional/transactional_update.pm#L101</a> is supposed to first install a non-failing version of the package, which is supposedly later replaced with a broken package. If this is correct the package contained in the tar archive should not contain any breaking script at all, only the package installed from the repository should do.</li></ol>			
<b>Reproducible</b>			
Always			
<b>Expected results</b>			
<ol style="list-style-type: none"><li>1. The transactional-update test should fail completely if the broken package test fails.</li><li>2. When testing with stagings the test should not break.</li></ol>			
<b>Further details</b>			
Always latest result in this scenario: <a href="#">latest</a>

- Subject changed from test fails in transactional\_update to [transactional][microos] test fails in transactional\_update

- Assignee set to mkravec

Hi martin, could you take a look?

#3 - 2019-10-15 13:59 - mkravec

- Assignee deleted (mkravec)

Sorry, not in my scope now.
