coordination # 49889 (In Progress): [functional][epic][y] Switch between installation/install shell in specific scenarios (hyperv, ssh,vnc)

[functional][y][timboxed: 12h] Make console switching working for hyper-v backend in the installer

2019-10-22 10:47 - riafarov

Status:	New	Start date:	2019-10-22

Target version:	future		
Description			
See motivation in the parent ticket.			
For hyper-v (e.g. https://openqa.suse.de/tests/latest?arch=x86_64&distri=sle&flavor=Server-DVD&machine=svirt-hyperv&test=lvm%2BRAID1&version=12-SP5) we cannot collect logs before the reboot, because we fail to switch tty's. We should explore what is possible there. We could try using chvt tool for that, which still requires some console.			
Also, after installation it works fine, so we might adjust hyperv_console_switch, which uses exactly chvt, whereas for the installer, we need to open xterm with alt-shift-ctrl-x key combo.

- Due date changed from 2020-04-07 to 2020-04-21

We have more issues on hyper-v, there was an idea to disable those tests till we stabilize backend. So postponing it for now.
