openQA Tests - action #59026

[functional][u] test fails in firefox - command and argument mistyped

2019-11-04 11:13 - SLindoMansilla

Status: Rejected
Priority: Normal
Assignee: zluo
Category: Bugs in existing tests
Target version: Milestone 30

Description

Observation

openQA test in scenario sle-15-SP2-Installer-DVD-x86_64-gnome_sled@laptop_64bit-virtio-vga fails in firefox

Tasks

1. Try to improve the situation with slower typing or with retries.

Reproducible

Fails since (at least) Build 77.1 (current job)

Expected result

Last good: 72.1 (or more recent)

Further details

Always latest result in this scenario: latest

Workaround

- Restart the job until mistyping is fixed.

checking this issue for firefox.  
collect some statics and see if it is still a problem:

http://f40.suse.de/tests/5887#five

#7 - 2020-01-08 08:43 - zluo
VNC_TYPING_LIMIT=18 used for laptop_64bit-virtio-vga on osd already.

I can see some other failed test module at moment on my local qa server, for example http://f40.suse.de/tests/5929#step/ImageMagick/88

#8 - 2020-01-08 09:29 - zluo
or it failed already before firefox at: http://f40.suse.de/tests/5935

#9 - 2020-01-08 11:48 - zluo
trying to overload the workers by starting extra workers so that the server becomes huge load and see whether is is reproducible.

#10 - 2020-01-09 07:32 - zluo
https://openqa.suse.de/tests/3766968#step/consoletest_finish/13 failed now because of needle screenlock is not matched. create new one and check this again.

#11 - 2020-01-09 08:42 - zluo

- Status changed from In Progress to Rejected

https://openqa.suse.de/tests/3770346 shows that we are fine with firefox, and VNC_TYPING_LIMIT is already used on osd for the testsuite.
