[functional] Support Server based on SLE12-SP3 is broken

2019-11-12 11:05 - jlausuch

Status:	Closed	Start date:	2019-11-12
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			

Description

Observation

Support Server fails to install NFS related packages in ARM.

https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/support_server/setup.pm#L530

Test suite description

Maintainer: Pavel Sladek psladek@suse.com

according to https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/tests/support_server/setup.pm#L35

Reproducible

Fails since (at least) Build [0372](#)

```
# zypper -n in rpcbind nfs-kernel-server | cat; ( exit ${PIPESTATUS[0]} ); echo yjD1U-$?-  
File '/content' not found on medium 'http://download.suse.de/install/SLP/SLE-12-SP3-Server-GM/x86_64/DVD1/'
```

Expected result

Last good: [0369](#)

```
# zypper -n in rpcbind nfs-kernel-server | cat; ( exit ${PIPESTATUS[0]} ); echo yjD1U-$?-  
Loading repository data...  
Reading installed packages...  
'rpcbind' is already installed.  
Package 'rpcbind' is not available in your repositories. Cannot reinstall, upgrade, or downgrade.  
'nfs-kernel-server' is already installed.  
Package 'nfs-kernel-server' is not available in your repositories. Cannot reinstall, upgrade, or d  
owngrade.  
Resolving package dependencies...  
Nothing to do.
```

Further details

The tests are using the same qcow2 image since a bunch of builds, and the reason why it got broken recently is because http://download.suse.de/install/SLP/SLE-12-SP3-Server-GM/x86_64/DVD1 does not longer exist.

We should build a new support server image using a newer repo. E.g. SP4:
http://download.suse.de/install/SLP/SLE-12-SP4-Server-GM/x86_64/DVD1

History

#1 - 2019-11-27 06:59 - okurz

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: hpc_BETA_mvapich2_mpi_supportserver
<https://openqa.suse.de/tests/3583201>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed

[sebchlad](#) you are using support server. If you feel this ticket is still valid let me know. Otherwise I will close it.

#3 - 2020-06-04 08:56 - sebchlad

For NFS I'm using one of the HPC nodes and not support server, so sure, you can go ahead and close this item.
Thx for following up!
