<b>Target version:</b>	Milestone 30+		
<b>Difficulty:</b>			

#### Description

### Observation

Seems like the spc keystroke is not click the checkbox as it is expected but instead it presses the next button. this is observed on s390 as there is no occurrence in other archs

It might be that we need to tab to the list.

We also need to check if there are two mechanisms in place, like clicking on checkboxes instead of iterating over the list which is fallback, when needle is not visible.

We should attempt to unify flows of module selection for registered and unregistered installations.

[https://openqa.suse.de/tests/3598118#step/scc\\_registration/13](https://openqa.suse.de/tests/3598118#step/scc_registration/13) vs [https://openqa.suse.de/tests/3597803#step/addon\\_products\\_sle/4](https://openqa.suse.de/tests/3597803#step/addon_products_sle/4)

openQA test in scenario sle-15-SP2-Full-s390x-skip\_registration@s390x-kvm-sle12 fails in [addon\\_products\\_sle](#)

### Test suite description

Maintainer: okurz, riafarov

Like a standard scenario with explicit skipping of SCC registration in case where we register by default, e.g. for SLE >= 15  
See <https://progress.opensuse.org/issues/25264> for details.

### Reproducible

Fails since (at least) Build [72.1](#)

### Expected result

Last good: (unknown) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

#### History

#1 - 2019-11-18 08:59 - riafarov

- Due date set to 2019-12-03

- Target version set to Milestone 30+

It looks more like someone has created wrong needle and entry is not highlighted. I will remove it. Someone is actually ybonatakis =D

#2 - 2019-11-19 14:03 - riafarov

- Priority changed from Normal to High

**#3 - 2019-11-20 10:09 - riafarov**

- Subject changed from *[functional][y] spc key mapping doent perform a selection on s390 to [functional][y] first entry in product selection list is not highlighted on s390*
- Description updated
- Status changed from *New to Workable*
- Estimated time set to *5.00 h*

**#4 - 2019-11-25 14:16 - oorlov**

- Status changed from *Workable to In Progress*
- Assignee set to *oorlov*

**#5 - 2019-11-25 14:27 - riafarov**

We see this issue now on other setups as well: <https://openqa.suse.de/tests/3628491> and [https://openqa.suse.de/tests/3624104#step/addon\\_products\\_sle/4](https://openqa.suse.de/tests/3624104#step/addon_products_sle/4) ...

**#6 - 2019-11-25 14:52 - oorlov**

hyperv is fixed by just removing the wrong needle (addon-products-all\_packages-base-highlighted-20191122): <https://openqa.suse.de/tests/3629067>

**#7 - 2019-11-26 12:44 - oorlov**

- Status changed from *In Progress to Resolved*

PR: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/8998>

Verification run on OSD: <https://openqa.suse.de/tests/3632935>
