Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:	QE Kernel Done		
Difficulty:			

Description

Observation

openQA test in scenario sle-15-SP2-Installer-DVD-ppc64le-kernel-live-patching-spvm@ppc64le-spvm fails in [qa_test_klp](#)

Test suite description

Reproducible

Fails since (at least) Build [89.1](#)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

git package should be git-core on sle15.

History

#1 - 2019-11-19 12:02 - pcervinka

- Status changed from New to In Progress

We could change test code to install git-core instead of git, but it helped to discover that our spvm installation is without sdk module (which contains full git). I will experiment with and update default spvm installation job.

#2 - 2019-11-19 12:32 - pcervinka

- Status changed from In Progress to Feedback

Added SCC_ADDONS=sdk to default_kernel_spvm job. Let's see next run.

#3 - 2019-11-29 07:06 - pcervinka

- Status changed from Feedback to Resolved

git installed https://openqa.suse.de/tests/3641170#step/qa_test_klp/3

#4 - 2020-01-14 08:05 - jlausuch

- Target version changed from 445 to 457

ok last 3 runs: https://openqa.suse.de/tests/3778926#next_previous

#5 - 2020-10-23 13:41 - pcervinka

- Target version changed from 457 to QE Kernel Done
