History

#1 - 2019-11-18 18:37 - okurz

- Status changed from In Progress to Feedback

<https://github.com/os-autoinst/openQA/pull/2516>

#2 - 2019-11-19 08:49 - cdywan

```
# Failed test 'one job allocated'
# at t/05-scheduler-full.t line 132.
# got: '0'
# expected: '1'
# Looks like you failed 1 test of 1.
t/05-scheduler-full.t .. 7/?
# Failed test 'Simulation of unstable workers'
# at t/05-scheduler-full.t line 178.
Can't use an undefined value as a HASH reference at t/05-scheduler-full.t line 133.
```

Seems to me like the test is buggy. The error seems to refer to this:

```
is(@{${allocated}[0]->{job}, 99982, 'right job allocated');
```

#3 - 2020-01-17 05:31 - okurz

- Related to action #62015: jobs incomplete without logs as some workers are rejected (was: Scheduler does not work) added

#4 - 2020-01-23 12:55 - okurz

- Status changed from Feedback to Workable

- Assignee deleted (okurz)

- Target version changed from Current Sprint to Ready

So <https://github.com/os-autoinst/openQA/pull/2516> is merged. I did not invest further time in making tests more stable here but there is also the related [#53498](#)

#5 - 2020-01-24 13:12 - okurz

- Related to action #53498: [sporadic] openQA CI tests fail on master in flaky/unstable t/ui/26-jobs_restart.t added

#6 - 2020-01-24 13:17 - okurz

- Status changed from Workable to Feedback

- Assignee set to okurz

Checking stability in <https://github.com/os-autoinst/openQA/pull/2496>

#7 - 2020-02-24 07:25 - okurz

- *Status changed from Feedback to Resolved*

The above and also latest commit from mkittler ae1b7450a seemed to have helped. As our list of "unstable" tests is currently empty but tests seem to be stable I regard this as resolved.
