Description

Observation

openQA test in scenario sle-15-SP2-Online-x86_64-autoyast_y2_firstboot@64bit fails in yast2_firstboot

We need a workaround for this issue, or reuse common methods to assert booting.
In these failures we are using a different logic. It also fails in autoyast_first_boot test suite.

Test suite description

Smoke test for YaST2 Firstboot module, basically same as yast2_firstboot test suite. Test pre-defined autoyast profile, which enables YaST2 Firstboot during system deployment. SUT should boot to YaST2 Firstboot wizard after reboot. Test goes through all Firstboot tabs, configure root and user accounts. SUT should end up in GDM screen after exiting YaST2 Firstboot.

Reproducible

Fails since (at least) Build 99.1

Expected result

Last good: 97.1 (or more recent)

Further details

Always latest result in this scenario: latest
