Description

Observation

oneQA test in scenario sle-15-SP2-Online-x86_64-gnome_sled@laptop_64bit-virtio-vga fails in evolution

so it seems that something changed regarding screen resolution

Test suite description

same with testsuite 'gnome' but it is for SLED

Acceptance Criteria

**AC1: check if there was a change in screen resolution
**AC1-A: if yes, create new, meaningful needle
**AC1-B: if no, find root cause and file proper product bug if necessary or adapt the test accordingly

Reproducible

Fails since (at least) Build 97.1

Expected result

Last good: 93.1 (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 2019-12-18 13:32 - dheidler
- Status changed from Workable to In Progress

#2 - 2019-12-18 13:36 - dheidler
- Status changed from In Progress to Feedback

It doesn't look like a changed screen resolution (other test modules don't have this issue) - the evolution application is just starting with a different window size.

Santi already created a needle: evolution-main-window-20191218.json

#3 - 2019-12-18 13:38 - dheidler
- Assignee set to dheidler

#4 - 2020-01-03 08:20 - mgriessmeier
- Target version changed from Milestone 28 to Milestone 30

2021-05-10
still fails, need to check next week

#5 - 2020-01-08 13:09 - dheidler
- Status changed from Feedback to Resolved

The new needle fixed it: https://openqa.suse.de/tests/3759412
