Target version:			
Difficulty:			

Description

Observation

The full media have new warning popup when you try to skip registration. That makes the latest build fails. On the skip_registration jobs for full media we need, likely, to adjust the flow after the the skipping, too. related ticket <https://jira.suse.com/browse/SLE-7222> and <https://trello.com/c/pyqFurT6/1441-3-updater-registration-handling>.

openQA test in scenario sle-15-SP2-Full-x86_64-offline_install+skip_registration@64bit fails in [scc_registration](#)

Test suite description

Maintainer: riafarov

Offline installation. Skipping registration for SLE 15, as requires network connection. This is default behavior for SLE 12.

Reproducible

Fails since (at least) Build [108.1](#) (current job)

Expected result

Last good: [105.4](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

Sometimes it's really just missing needle. <https://openqa.suse.de/tests/3718335>

#2 - 2020-01-02 07:04 - okurz

This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: offline_install+skip_registration
<https://openqa.suse.de/tests/3715189>

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released"
3. The label in the openQA scenario is removed
