Description

Observation

openQA test in scenario opensuse-15.2-DVD-x86_64-gnuhealth@64bit fails in [gnuhealth_setup](#)

Test suite description

Maintainer: okurz@suse.de
Test scenario for gnuhealth software stack

Reproducible

Fails since (at least) Build [542.1](#)

Expected result

Last good: [539.3](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2019-12-18 12:01 - mlin7442

I was hoping I can provide some information for debugging, but it just a blank screen.

#2 - 2019-12-18 14:12 - okurz

- Status changed from New to Feedback

- Assignee set to okurz

well, you updated gnuhealth in <https://build.opensuse.org/request/show/754746> , you could have shared that information :)

I assume we can fix the test simply by updating the version checks I have introduced recently for the same update in TW.

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/9199>

#3 - 2019-12-18 15:06 - mlin7442

Oh, yes, I wasn't thought that update will change the things like that, my bad. Thanks for fixing.

#4 - 2019-12-18 16:40 - okurz

<https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/9199> merged. Needles created. Retriggered production test:
