

openSUSE Leap 15.2 - action #61308

evaluate results of manual testing with release manager

2019-12-20 13:00 - Inussel

Status:	Resolved	Start date:	2020-04-22
Priority:	Normal	Due date:	2020-04-24
Assignee:		% Done:	0%
Category:	QA	Estimated time:	0.00 hour
Target version:	GM		
Description			
The results of the manual testing initiative should be talked over with the release manager to determine whether the release is ready for release.

Reviewed, we're all good.

There is a ucode-intel update which was "now" accepted, and will enable installation on latest hardware. Users who would do an offline installation on newer employee Dell models would fail as they'd need a new ucode-intel.
