openQA Tests - action #61946
[functional][y] Automate yast2-ntp-client module
2020-01-09 06:49 - JERiveraMoya

Status: Resolved
Priority: Normal
Assignee: syrianidou_sofia
Category: New test
Target version: Milestone 32
Difficulty:

Start date: 2019-11-20
Due date: 2020-05-05
% Done: 0%
Estimated time: 0.00 hour

Description
Exploratory manual testing was done in https://progress.opensuse.org/issues/60086 and now we can automate with AutoYaST.

Check that systemd timers are used and not cron. Basically we need to check:

- timer file is present as described in https://progress.opensuse.org/issues/60086#note-8.
- Check related services

Acceptance criteria

1. Timers are covered for yast2 ntp
2. Installation is validated after ntp is configured
3. Generation of the profile is also validated

Further info
For checking the service we need to fill in on the UI a proper ntp server.
It was forgotten to attach the AutoYaST profile in previous ticket, so first thing is cloned the system and create some minimal profile to work on and finally do some validation of the file and the service involved.

We also could combine this with other existing autoyast

See https://jira.suse.com/browse/SLE-9115 and https://jira.suse.com/browse/SLE-9103
