Description

Observation

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-yast2_nfs_v3_client@64bit fails in yast2_nfs_client

Yast, after a long years, was fixed to give proper return codes. SO if the code module does not exit normally, it does no longer return 0.

In case of the NFS modules, the last thing we get is an 'error' on shutting down, which is represented in ret 16

Test suite description

NFS multi-machine test suite. Maintainer jrivrain@suse.com

Reproducible

Fails since (at least) Build 20200111

Expected result

Last good: 20200110 (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

Proposal SR

#2 - 2020-01-14 16:09 - riafarov
- Subject changed from test fails in yast2_nfs_client: yast exit code 16 to [functional][y] test fails in yast2_nfs_client: yast exit code 16
- Assignee set to riafarov
- Target version set to Milestone 30

I actually think that it's [https://bugzilla.suse.com/show_bug.cgi?id=1144221](https://bugzilla.suse.com/show_bug.cgi?id=1144221)
Also somehow worked in the latest build [https://openqa.opensuse.org/tests/1142744#](https://openqa.opensuse.org/tests/1142744#)

We have 3 bugs for it:
[https://bugzilla.suse.com/show_bug.cgi?id=1144221](https://bugzilla.suse.com/show_bug.cgi?id=1144221)
[https://bugzilla.suse.com/show_bug.cgi?id=1150070](https://bugzilla.suse.com/show_bug.cgi?id=1150070)

I will track if failure occurs again and needs any action.
