<b>Target version:</b>			
<b>Description</b>			
<b>Motivation</b>			
Our ultimate goal is to execute tests with restapi library which is available on the medium and corresponding ruby gem. For the cases when we will modify rest-api, etc, this is essential to execute tests for the older versions of the distributions.			
<b>Acceptance criteria</b>			
1. Backward-compatibility mechanism is introduced into the solution			
<b>Suggestions</b>			
We can either simply tag ruby gem releases and use corresponding version, or we can make gem backward compatible and use Factory pattern to use matching api calls and functionality.
