Description

As we have learned in #62498 new support server image didn't help, so we will enable scenario with a workaround.

Test suite is enabled in the development job group: https://openqa.opensuse.org/tests/latest?arch=x86_64&distri=opensuse&flavor=DVD&machine=64bit_cirrus&test=remote_vnc_controller&version=Tumbleweed#settings

As per Yanis we could not reproduce the issue manually, so need to use openQA to get logs.

Acceptance criteria

1. Bug is filed regarding issue of machine not rebooting in the end of the installation
2. There is soft-failure in the test suite referencing bug from AC 1.
3. Test suite should use new support server we have created (support_server_tumbleweed@64bit.qcow2) riafarov will upload it shortly

History

#1 - 2020-02-18 09:54 - riafarov
- Description updated
- Status changed from New to Workable
- Estimated time set to 5.00 h

#2 - 2020-02-18 09:55 - riafarov
- Description updated

#3 - 2020-02-18 11:18 - riafarov
Image is uploaded to o3, so can be used in the test suite.

#4 - 2020-02-20 08:55 - riafarov
- Assignee set to riafarov

#5 - 2020-02-20 16:33 - riafarov
https://bugzilla.opensuse.org/show_bug.cgi?id=1164503 is filed, which is kernel bug. I will add soft-failure and enable test suite in main job group as the next step.

#6 - 2020-02-21 13:05 - riafarov
- Status changed from Workable to Resolved

Test suite enabled, soft-failure added.
