IP address has changed:
# host mirror.optimate-server.de
mirror.optimate-server.de has address 185.150.27.16

Unfortunately, the reverse mapping for 185.150.27.16 -> main1.optimate-server.de which means the ACL will block their access, if they tried. I'll write to the admin.

No response so far. I'm deleting this mirror.
