[desktop][sle15sp2] test fails in evolution_smoke

2020-02-26 01:00 - zcjia

Status: Resolved	Start date: 2020-02-26
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version:	
Difficulty:	
Description <p>This "evolution_smoke" test just fires up evolution, then add a "@aim.com" email address, then automatically figures out IMAP/SMTP settings. But this step often fails (probably due to network timeout?). I consider this test step is of little use, other evolution features are tested extensively in the following test steps.</p> <p>So I propose to remove this "evolution_smoke" test from "desktopapps-message" testsuite.</p> Observation <p>openQA test in scenario sle-15-SP2-Online-x86_64-x11-desktopapps-message@64bit-2gbram fails in evolution_smoke</p> Test suite description Reproducible <p>Fails since (at least) Build 126.1</p> Expected result <p>Last good: 122.1 (or more recent)</p> Further details <p>Always latest result in this scenario: latest</p>

[zcjia](#) There is a same issue created by QAM <https://progress.opensuse.org/issues/67408> which has been resolved to add a soft failure to handle this issue.

See <https://progress.opensuse.org/issues/67408#note-13> and <https://progress.opensuse.org/issues/67408#note-14>

So, do you agree to close this ticket as RESOLVED?

- Status changed from New to Resolved

Resolved, because this is now regard as a soft failure.
